

Assignment-5 Latex Report

Fuzayil Bin Afzal Mir

18/01/2021

• **Exercise 2.11**

1 Draw an equilateral triangle of side 5.5.

1.1 Solution

Let $\triangle ABC$ be an equilateral triangle of side 5.5

Since ,In an equilateral triangle all sides are equal to each other and also each angle is equal to 60° .

Therefore,

$$a=b=c=5.5$$

and

$$\angle A=\angle B=\angle C=60^\circ$$

• Exercise 2.12

2 Draw a $\triangle PQR$ with $PQ=4, QR=3.5$ and $PR=4$. What type of triangle is this?

2.1 Solution

In the given $\triangle PQR$,
 $PQ=4, QR=3.5$ and $PR=4$
 or we can say,
 $PQ=r=4$,
 $QR=p=3.5$
 and
 $PR=q=4$

In the given $\triangle PQR$, two sides are of equal length. (i.e $PQ=PR=4$) or
 $(r=q=4)$ which is the property of an isosceles triangle.

Therefore, the given $\triangle PQR$ is an isosceles triangle.
